

Fold Catalog

Project:

We will be using folding as the base operation for most of our projects this week. In order to do that, you will need to develop a “catalog” of fold types to pull from.

Instructions:

Follow the prepared templates to learn the basic versions of each fold.

Create your own motif for folding and test different ways of altering it.

Test out folding on non-rectangular paper.

Deliverable(s):

A set of different folded forms to use as your base for the rest of the week.
