

Texture, Material, Structure, and Light Studies

Project:

Document your lamp as a product that you would see in stores.

Instructions:

Photograph the lamp in both “On” (illuminated) and “Off” states. Document how light interacts with texture, material, and structure through your lamp. Additionally, photograph how user-friendly the assembly of your lamp is.

Deliverable(s):

Take photos on the provided camera in the photo area. If that camera is unavailable, use your phone and upload them to the link in the SDC app.
