

Exhibition Branding and Build Out

Project:

Now work as a studio to develop a plan for your shared exhibition tomorrow. As designers our work can only happen if we communicate clearly and effectively with people outside of our fields. With your studio clarify what your collective ambition for your area of Knoxville is. Figure out what the name of your overall project is and what kind of branding you might need to communicate the idea.

Instructions:

Work with your TA to come up with a plan for how to display your work from throughout the week in the exhibition. You might find out that you need another drawing or two to make the idea clearer. Perhaps you need a larger installation piece for your exhibition. Maybe your exhibition ties in with the studio next to yours. Make a clear plan for how you will complete your exhibition build out by the review on Friday.

Deliverable(s):

A clear plan for your exhibition.
